THE MARK OF  
AN INTELLIGENT  
MEETING

THE MARK OF AN INTELLIGENT MEETING

## InterWrite MeetingPad™ from GTCO CalComp

The InterWrite MeetingPad is an important part of the InterWrite Meeting Suite™ of intelligent, intuitive collaboration tools. Used with the InterWrite MeetingBoard, the cordless MeetingPad makes every participant a hands-on contributor. MeetingPad Manager allows multiple pads to be connected to the same system. So, anyone in the class or on the project team can highlight or annotate content and illustrate new ideas. GTCO CalComp's patented technology makes the MeetingPad uniquely flexible and effective.

INTERWRITE

# meetingp

*Versatile and portable, the cordless InterWrite MeetingPad lets you participate from across the room or across the world.*

### Learn by Doing!

It's a proven fact. People learn best by doing. Educators and trainers strive to incorporate hands-on involvement in their lessons, and InterWrite MeetingPad is the tool to do just that. MeetingPad equips your students to take control of presented materials, highlighting, annotating or modifying content. You can plan lessons that include participants and help them gain hands-on experience. With the Web features of InterWrite Meeting Services™, people in other locations can join your training session in real time – and use MeetingPad to contribute as if they were just across the room. Now, whether it is simple math or complex rocket science, students can take an active part in their own education!

### Easy to use

Connect the InterWrite MeetingPad Manager™ to the PC and press a button. You're ready to work. Launch InterWrite Software with the click of the electronic pen and start writing. Or, use the pen as a mouse to operate applications – all the InterWrite Software™ features and functions are available. You write naturally, because MeetingPad is based on GTCO CalComp's patented designs and years of experience in pen input technologies. Best of all, MeetingPad is the only cordless individual collaboration device on the market today. No cords confine you to the computer or prevent sharing a MeetingPad with others. For a larger group, MeetingPad Manager can support up to eight MeetingPads, so truly everyone can contribute. No other meeting solution makes intelligent, flexible collaboration more simple.

## Front-of-the-room control from anywhere

- When using the MeetingPad in conjunction with an InterWrite MeetingBoard™, contributors can add their feedback without leaving the comfort of their seats. Spread several MeetingPads around the room and all participants can add their comments.
- With Meeting Services, connect to a meeting in another location and annotate from your desk. It's as good as being there!
- Write at your desk, for convenient mark-ups on your daily work and sophisticated application control with all mouse functions!
- Need to present to a large group? Project on any wall and turn it into a virtual electronic whiteboard with MeetingPad! Control the presentation from the podium or anywhere in the room.

## Collaboration is the key to success!

It is critical in business today to communicate faster and more effectively than the competition. In meetings, it's more important than ever to convey thoughts and ideas in ways everyone can understand. InterWrite MeetingPad makes collaboration easy. Whether you are reviewing an engineering design, brainstorming for ideas, or planning a new website, InterWrite MeetingPad can get everyone on the same page. With it, each user has the ability to add or modify content and convey his or her thoughts to the entire group. With InterWrite Software and the InterWrite MeetingBoard, the conference room can become the greatest productivity center in your company. Add the Web features of InterWrite Meeting Services, and collaborate with conference rooms across the world!

# ad

*The convenient, cordless MeetingPad has a 6" x 9" writing surface. Side buttons on the pen provide right-click and double-click mouse features.*

*The InterWrite MeetingBoard is a sleek, electronic whiteboard with sophisticated one-tap pens. With InterWrite Meeting Services, you can connect to remote participants in real time.*

## Tablet Physical Dimensions

Active Area	Width	Height	Thickness
6 in x 9 in/152 mm x 228 mm	12 in/304.8 mm	11.25 in/285.8 mm	1 in/25.4 mm

## Included With Your Purchase

### InterWrite MeetingPad

- InterWrite MeetingPad
- InterWrite Software
- Lite Touch pen
- Pen tether
- Low battery indicator
- Sleep mode
- Charger

\*MeetingPad Manager: Specify if required

The MeetingPad Manager is the RF interface that allows the MeetingPad to communicate with the PC. A MeetingPad Manager is required with the first purchase of a MeetingPad. If additional MeetingPads are purchased and will be used with the same PC, an additional MeetingPad Manager is not necessary. One MeetingPad Manager can support up to eight MeetingPads. Some users may find that they use their MeetingPad in multiple locations (in the conference room, at their desk, in a training room). In this case, we recommend a MeetingPad Manager in each location for convenience.
