# THE MARK OF AN INTELLIGENT MEETING

**interwrite™**  
SOFTWARE

Interactive Mode

PC Whiteboard Mode

## **InterWrite MeetingBoard™**

Use InterWrite Software with InterWrite MeetingBoard in Interactive Mode and enjoy complete control of meeting content. MeetingBoard's electronic pens provide access to all InterWrite features, plus full mouse control! When used in PC Whiteboard Mode, InterWrite

Software captures all your dry erase notes exactly as written. In either mode, use InterWrite Viewer to review, print and email meeting notes.

InterWrite Viewer

## **InterWrite Software**

The most intuitive, easy to use meeting software available today. InterWrite's floating toolbar (left) provides instant access to all InterWrite features.

## **InterWrite Software™**

It's simple. To develop the most intelligent meeting system — you'd have to start with the most intelligent meeting software ever created. InterWrite Software was developed by GTCO CalComp to be just that.

We created the most advanced, intuitive meeting tools — and put them directly at your fingertips. With one-click control, InterWrite Software lets you pick up a digital pen, touch an icon on a floating toolbar, and instantly change the way you meet to sell, manage, teach or design. In your conference room. Or around the world. Simple? Yes. Intelligent? Completely.

InterWrite Software was designed so you can quickly annotate, highlight and erase directly on any Windows®-based application, including PowerPoint slides, websites, CAD drawings, maps or spreadsheets. With the InterWrite floating toolbar you can select pen colors, and widths. Then move, cut, copy and paste

the objects you have digitally inked. You can save exactly what you want, exactly as written, together with the underlying application image. Insert a blank page to record brainstorming notes and action items. Toggle forward and backward through saved screens to review. And, using the InterWrite Viewer, you can save, zoom, delete, or resequence your meeting notes.

Now, print or e-mail the results to everyone. Since the images can be saved in a self-executable file, anyone can view InterWrite documents (even if they don't have InterWrite Software). What could be simpler?

Together with the web features of InterWrite Meeting Services™ and the powerful presentation qualities of InterWrite MeetingBoard, InterWrite Software is simply the most intelligent meeting and collaboration software available today.
